O Leveraged React Js resources for all data access, encapsulating URL's and standardizing data access interfaces.

O Maintaining Parent and Child elements by using State and Props in React 5.

O React and Functional Driven Javascript expert in SPA's, UI Components, Mobile web and Performance optimization.

O skilled in leading frameworks as React JS to build high-quality, scalable and reusable components and Front-end solution.

O The front-end use HTMLS, CS53, React J5, JQuery and Bootstrap to build a single page web app that communicate with back-
end via RESTful API.

O Responsible for implementing UI mockups, integrating third party React libraries, and handling/creating Redux store data.

O The back-end use of Node Js, Express J5, MongoDB and Mongoose, the complete MERN Stack to provide RESTful API.

O Worked with Gulp, Node Packet Manager, MongoDB and used React J5 library functions for the logical implementation part

at client side for all the application.

O Implemented generating the verification hash code using Node J$ and added user validations and user permissions by using
Node Js.

O Created React s for reusable components (multi-field form elements), background file uploads.

O Implemented React J$ Controllers to maintain each view data.

O Architected and Developed for Large Scale Javascript Application with React J5.

O Migrated existing codebase from JSP to J§ and HTMLS and rebuilt React components in ES6.

O Used various properties, parameters in ⎕ 56 and performed UNIT testing with Jasmine and web-services like RESTful APL.

O Used D3Js to build data visualizations to monitor file server load, web server speeds and data processing.

O Developed certain features of the application functionality L.e. CRUD (Create,

Read, Update, Delete) features using

Require.js and Responsive Design.

O Worked with Angular J$ Forms, Validations, Modules, Factory Services,

DOM, Events, Expressions, Directives, Controllers,

Filters, $http, $q.

O Used $http with Angular J$ Interceptors MEAN Stack to make sure the

requests were valid and used ul-router to handle

nested views and avoid page redirection.

O Implemented a custom Node J$ script to act as a PROXY for connecting to

the server.

O Extensive usage of Javascript, React J5, Node J5, Bootstrap, JQuery/AJAX,

JSON, HTML4/S, CS52/3.

O Evaluate demo and select new Javascript technologies and development

patterns to be leveraged across the team.

O Implemented the function to send and receive AMQP messages on

RabbitMQ synchronously and asynchronously.

O Developed non-functional HTMLS, CSS3 pages from the mock-ups and

involved in UI review with UI architect and Business
units.

O Used Karma & Jasmine for the frontend (Angular J5) unit testing and Mocha &
Chai for the backend (Node JS).

O Automated the ATDD test scripts using Sauce Labs, ATDD testing using
Cucumber and Selenium Webdriver.

 Open shift Environment (OSE3) as a Docker to run the application and
Jenkins to CI/CD of the project.

O Very proficient knowledge of JIRA (Rally) to track issues and communicate
with other teams at various environments.

O Involved in all the stages of Software Development Life Cycle like Application
Design, Development, Debugging and Testing
all applications.
